

MKM RACING HAND TIMERS AWARD

(There is no entry fee required)

If you are competing in the event without the aid of a computer clock to assist in your timing efforts, then you will be interested in this special awards class.

To be eligible for the "Hand Timers Award" you must be timing your run down the course with only the following:

- A: Standard Stop-Watch
- B: Standard Non-programmable Calculator
- C: Wristwatch
- D: Sundial
- E: Nothing At All

SORRY, but the presence in the car of rally computers, GPSs, or other timing devices besides those listed above will make you ineligible for this special award. (Yes, we know that many cars come with non-GPS trip computers. Our position is that using one in Hand Timers violates the spirit and intent of the award. You will be on your honor here, we're not going to police this, and most of them are not accurate enough anyway. Let your conscience be your guide. But if your car has a GPS, even an OEM one, you're out. Exotic stuff like pre-recorded cueing systems are verboten too.)

When the final results are in, we will look at all of the "Hand Timers" averages and their target speeds. The "Hand Timer" that averages closest to his/her target speed will win the special Hand Timers Award.

To enter this special class, please fill out this form, and return it with your entry to MKM Racing Promotions.

GOOD LUCK!!

Driver: _____ Navigator: _____
Car Number: _____ Target Speed: _____
Method of Timing: _____

Check which event you're entering:

_____ Bonneville 100 – June 19-21, 2008

_____ Pony Express 130 – Aug 21-24, 2008
